

a

pairwise conservation (dot: observed; red tick: detectability floor)

**b**

n-way spectrum (universe: 2,012 subfamilies shared by all 4 proteomes)

**c**

8 subfamilies persulfidated in Arabidopsis, rice and Magnaporthe alike

- Peptidyl-prolyl cis-trans isomerase D-related
- Fructose-bisphosphatase
- Glycine dehydrogenase (decarboxylating), mitochondrial
- Alanine--glyoxylate aminotransferase 1
- L-threonate dehydrogenase (aldolase superfamily)
- NADH-ubiquinone oxidoreductase 75 kDa subunit, mitochondrial
- Sorbitol dehydrogenase
- Regulator of chromosome condensation (RCC1)

grey: the two non-redox exceptions (PPIase D-related, RCC1)
